- 1 Overview
- 2 Steps
- 3 Environment

Overview

Outline

- 1 Overview
- 2 Steps
- 3 Environment

Steps

- 1 Install requisite packages
- 2 Download Gem5 and compile it for ARM → gem5.opt
- 3 Download Linux kernel and cross-compile it for ARM → vmlinux-3.12
- 4 Configure M5_DIR (vmlinux-3.12, linux-arm-ael.img)
- 5 Run and test (m5term)

Steps

- 1 Install requisite packages
- 2 Download Gem5 and compile it for ARM -> gem5.opt
- 3 Download Linux kernel and cross-compile it for ARM -> vmlinux-3.12
- 4 Configure M5_DIR (vmlinux-3.12, linux-arm-ael.img)
- 5 Run and test (m5term)

Steps

- 1 Install requisite packages
- 2 Download Gem5 and compile it for ARM → gem5.opt
- 3 Download Linux kernel and cross-compile it for ARM →
vmlinux-3.12
- 4 Configure M5_DIR (vmlinux-3.12, linux-arm-ael.img)
- 5 Run and test (m5term)

Steps

- 1 Install requisite packages
- 2 Download Gem5 and compile it for ARM → gem5.opt
- 3 Download Linux kernel and cross-compile it for ARM → vmlinux-3.12
- 4 **Configure M5_DIR (vmlinux-3.12, linux-arm-ael.img)**
- 5 Run and test (m5term)

Steps

- 1 Install requisite packages
- 2 Download Gem5 and compile it for ARM → gem5.opt
- 3 Download Linux kernel and cross-compile it for ARM → vmlinux-3.12
- 4 Configure M5_DIR (vmlinux-3.12, linux-arm-ael.img)
- 5 Run and test (m5term)

Outline

- 1 Overview
- 2 Steps
- 3 Environment

Environment

Table: Hardware and operating system

Device	Optiplex GX620	
	CPU	Pentium D 3.00GHz X 2
	Memory	2GB
OS	Ubuntu 13.04	
	ISA	AMD64
	Swap	2GB
